Polish — C1 — Advanced

About me

I love programming and I want to develop my skills.

I will be glad to work in a company in which there is an opportunity both to show my abilities and to learn something new.

In addition to official experience (to develop my skills), I had been developing PHP modules for an online RPG game for 5 years. (pure php 5.6 => php 7.4 + SQL).
If necessary, I am ready to perform any test task.

Code examples can be found here: https://github.com/KlipeLD
